Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/09/2017 has been entered. Claims 18 and 24 were amended and new claims 33-34 were added. Currently claims 18-19, 24-26 and 31-34 are pending for examination in this application.

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Examiner asserts the "second bolus" contains a "port" as defined in claim 18, but later claims that the "second bolus" "does not contain a port", as shown in Applicant's Figure 24, the second bolus has a port near 11 to which the single

lumen catheter is attached. Claim 19 is indefinite because it contradicts the port language of claim 18.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30-32 rejected under 35 U.S.C. 102(b) as being anticipated by Sogard et al. (USPN4,944,745). Sogard et al. discloses a perfusion catheter assembly.

Regarding claims 30-32, Crocker et al. a catheter (14, Figures 1-2) for delivering fluid into and aspirating fluid out of a body cavity or cavities comprising: a first tube (14) arrangement containing at least first and second lumens (30, 32) extending from a proximal end of said first tube arrangement to a distal end thereof, one of said first and second lumens extending further than the other of said first and second lumens in said distal end; a second tube arrangement (42) containing a single lumen extending from a proximal end of said second tube arrangement to a distal end thereof; a connecting member (18, 45, 20) connecting said distal end of said first tube arrangement with said proximal end of said second tube arrangement where said first lumen in said first tube arrangement is in fluid communication with said lumen in said second tube arrangement; a first fluid port (36) in the side of said connecting member in fluid communication with said second lumen; and a second fluid port (46) in the distal end of

said second tube arrangement in fluid communication with said single lumen (Figures 1-7, cols 1-2).

Allowable Subject Matter

Claims 18, 24-25, and 33-34 are allowed.

Response to Arguments

Applicant's arguments with respect to claims 19 and 30-32 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure, see PTO-892.
